## PROFESSIONAL EXPERIENCE

### Full-Stack Developer

SMART BRAIN APP

- Developed a containerized full-stack web application using Docker, React, ExpressJS, Redis, and Postgres, allowing users to utilize machine-learning to detect faces within images, profile customization, and session management.
- Designed a RESTful ExpressJS server enabling users to be stored persistently in an encrypted online database.
- Incorporated Redis and JSON Web Token (JWT) authentication, allowing users to cache, update and maintain their current profile session.
- UTILIZED : Docker, NodeJS, ExpressJS, Redis, JWT, Bcrypt, KnexJS, Postgres, REST API, AWS Lambda, Clarifai API, React, React Particles, Jest, Tachyons, ESLint, Prettier, Heroku, Git

### Web Designer / Content Contributor

ZERO TO MASTERY | RESOURCES

- Contributed additional resources and improved UI/UX to an open-source project which lists excellent resources for developers to use as they learn, build, design, and deploy their projects.
- Established responsive and consistent UI/UX by increasing animation speed on interactive elements and matching color palette to overall theme of web application.
- UTILIZED: JavaScript, CSS3, HTML5, Git

### Front End Developer

ROBOFRIENDS APP

- Designed a Progressive Web App (PWA) using React and Tachyons to mimic FB's active search feature by utilizing Robohash API.
- Optimized Performance as measured by 100% ratings across all metrics (Performance, PWA, Accessibility, SEO, Best Practices) via Google Lighthouse PWA Analysis Tool.
- Established potential scalability to hold and store multiple states by integrating Redux into the project.
- UTILIZED: React, Redux, Jest, Tachyons, ESLint, Prettier, Google LightHouse, CircleCI, Git, GH Pages, Robohash API

## SKILLS

### Software

#### PROFICIENT

- React
- NodeJS
- ExpressJS
- JavaScript
- CSS3
- HTML5

#### FAMILIAR

- Docker
- Redis
- Redux
- PostgreSQL
- Jest
- CI / CD
- Webpack
